

**Pre-purchase your fuel
and lock in the price.**

If you consume more than 100 gallons of fuel per month, then MoreGallons is for you. It's ideal for businesses large and small. The MoreGallons program can also protect you from rising fuel costs for boats, motorhomes, farm equipment, and airplanes.

It's like having your very own fuel reserve.

MoreGallons allows you to pre-purchase bulk quantities of fuel and lock in the current price at that time. Later, when fuel prices rise, you can tap into your reserve and use your MoreGallons to avoid the price increase. The more prices rise, the more you can save.

How MoreGallons Works

Join. Pre-purchase. Cash in.

Once you become a MoreGallons member, you pre-purchase your fuel from the MoreGallons.com web site. Then, continue to make your fuel purchases at the pump with your choice of credit or fuel card just like you always have. When you're ready to use your gallons, simply indicate the number of gallons you wish to cash in and the money will be transferred into your checking account within 3 business days. The money you receive from MoreGallons can be used to pay your credit card or fleet fuel card bill.

*The MoreGallons Price for unleaded gas or diesel fuel is based on the current commercial rates for fuel in the United States. Members pre-purchase and cash in fuel at the current MoreGallons Price.

How to save money with MoreGallons

Here's an example of how the MoreGallons Program can protect you from the rising cost of fuel.

It's easy to pre-purchase your fuel with MoreGallons. Do it today—there's never been a better time to provide you or your company with real protection against rising fuel prices.
